

Diagnoss Joins NVIDIA Inception

Diagnoss has joined [NVIDIA Inception](#), a program that nurtures startups revolutionizing industries with technological advancements.

Diagnoss' provider enablement platform provides real-time, value-add guidance, nimble access to clinical data and simplified workflows, reducing the time to complete daily tasks. Trained on Centers for Medicare and Medicaid (CMS) de-identified data, our proprietary model reads clinical notes in real time and recommends billing codes based on the content of notes. Leveraging our API enabled infrastructure and EHR sidebar, providers have full visibility and explainability into medical coding decisions which leads to better organizational results and reducing coding errors, and eliminates the need for providers to swivel chair to the billing portion of their EHR, or spend evenings or valuable patient time entering in billing codes.

Joining NVIDIA Inception will help Diagnoss to grow our impact in the healthcare and public sector space by providing us with go-to market support and technology assistance to expand and grow our models. The program will also offer us the opportunity to collaborate with industry-leading experts and other AI-driven organizations.

"NVIDIA is the gold standard for hardware and software, and we are thrilled to be accepted to their exclusive Inception program. We see this as a great opportunity to grow as a company, and expand our network in the healthcare and public sector space." -Mandy Peckham, Co-Founder of Diagnoss

About Diagnoss

Diagnoss is a provider enablement company that improves the workflows and outcomes of clinicians through a patent-pending EHR augmentation platform. Diagnoss provides clinics and hospitals with the infrastructure to supplement their EHRs with bespoke tools that support clinicians in their daily work. To demo one of Diagnoss's tools, which speeds up diagnosis documentation for clinicians, visit demo.diagnoss.com.

About NVIDIA Inception

NVIDIA Inception helps startups during critical stages of product development, prototyping and deployment. Every Inception member gets a custom set of ongoing benefits, such as [NVIDIA Deep Learning Institute](#) credits, preferred pricing on NVIDIA hardware and software, and technological assistance, which provides startups with the fundamental tools to help them grow.
